Product

Bike-Shell® Model 351

Capacity

1 door/1 Bike

Materials

Locker is manufactured of molded fiberglass reinforced plastic composite with a smooth "X" and "Y" pattern on stippled walls and top, with smooth door frame and stippled door.

Materials will withstand extremes in temperature and other weather/environmental conditions. Lockers shall not use an external or internal frame. Walls and top shall be double wall construction for high strength and insulation from the elements. The locker body components shall be joined by internal fasteners.

Roof is crowned for water run-off. Finish of UV stabilized gelcoat does not need painting, allows solvent removal of graffiti and is resistant to impact and UV damage.

Setback

Please allow 5ft clearance for door

Hardware

Internal heavy duty locking hardware consists of a sliding locking bar, 4feet, 2 inches in length which is secured to the door with 1/2 inch stainless steel bolts and rides on Teflon washers. Movement of locking bar is controlled by stainless steel cams attached to the shaft of the lock. High quality heavy duty gauge stainless steel continuous door hinge with not rust. All fasteners and assembly hardware is zinc plated or better.
